Sei es um ein neues Kabel an ein Gerät zu löten oder eine Schaltung vom Steckbrett auf die Lochrasterplatine zu übertragen - irgendwann wird auch in Ihrem Projekt Lötzinn fließen. Irgendwie löten kann jeder, nur wie kommt man zu einer langlebigen Lötstelle? When building electronics projects, using a soldering iron becomes inevitable. Whether you just want to attach a new wire to a device or to transfer a circuit from a breadboard to a stripboard, at some time in your project, you have to use solder. Nearly everyone can solder in some way, but how do you produce a long-lasting solder joint? In diesem Lernpaket lernen Sie Schritt für Schritt das Lötten. Das gelernte Wissen setzen Sie direkt in zahlreichen Experimenten ein. Sie lernen auch die Königsdisziplin, das Einlöten von SMD-Bauteilen. Um das Wissen praktisch umzusetzen, liegen dem Paket zwei Übungsplatinen bei. Am Ende löten Sie sogar Ihr eigenes Arduino(TM)-Shield. In this tutorial kit, you will learn to solder step by step and directly apply the new knowledge in numerous experiments. You even learn the most challenging technique, i.e. soldering SMD components. The kit contains two practice boards to put your new-found skills into practice. Finally, you will even solder your very own Arduino(TM) shield. Für perfekte Lötstellen ist mehr als nur ein Lötkolben notwendig. You need more than just a soldering iron to produce perfect solder joints. Hochauflösende Bilder zeigen die Ergebnisse des Lötens.
