RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 116 pages. OCLC Number: (OCoLC)45592333 Subject: Baby boom generation -- Retirement -- United States. Excerpt: . . . 11 postentitlement computations over the last few years have eliminated hundreds of thousands of errors. And, while we have an error rate of less than 1 percent, I should point out that roughly 70 percent of Social Security overpayments in the Old Age and Survivors program are due to the earnings test. While there will be short-term costs to implement the recent action by the House to repeal the earnings test at the normal retirement age, in the long term it will free up resources now spent on administering that provision and collecting overpayments. Also, from a policy standpoint, eliminating the earnings test at normal retirement age is the right thing to do. As the baby boomers begin to retire, it is more important than ever that older Americans who are willing and able to work should not have their Social Security benefits deferred when they do work. Because the administration of the Disability programs is more complex, there is more case error in the Disability programs, but accuracy trends there are also positive. In fact, during this past fiscal year, improvements were noted in every level of disability decision making for both awards and denials. A part of our plan for the long-term management of the disability program includes engaging the services of an independent consultant to assist us in assessing our quality assurance requirements and developing options for improvement. On another crucial front, I initiated a series of actions to attack the problem of the accuracy rate in the SSI program. The General Accounting Office (GAO) has designated the SSI program as high risk, and action...
