Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Maximum Production in Machine-Shop and Foundry The material on which the present book is based was most of it contained in three series of articles published originally in The Engineering Magazine at various times from October, 1908, to May, 1911. It was all written in the very atmosphere of the busy manufacturing plant and under the influence of daily contact with the problems and methods discussed. Everything in it represents some phase or period of the authors personal experience. As here gathered in volume form, however, the material is all resurveyed, rearranged, largely recast, from the viewpoint of a larger experience and a maturer study of the mechanical industries and more advanced principles and methods of management. The result is a logical, well-proportioned and well-balanced development of the subject from beginning to end, by which the relations of all its elements will be much more clearly understood. The discussion will be followed again with new and increased interest and reward, even by those who read the articles as they appeared in sequence in The Engineering Magazine. The machine-shop and foundry in Mr. Knoeppel s book are considered as twin factors in production, so closely related throughout a vast range of metal manufacturing that their problems can best be studied together. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
