There are many able works on the subject, but far too deep and scientific to reach the class most deeply interested. This work is gotten up especially for amateur builders and non-professional men. All measurements and instructions for winding are taken from machines in actual service. Particular attention has been given to every detail of construction, that they may be thoroughly understood. This work will be of great value, not only to those who wish to build dynamos, but to superintendents, engineers and workmen who have the care of present established systems.
