RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Original publisher: Washington, D. C. : U. S. Govt. Accountability Office, 2010 OCLC Number: (OCoLC)613344932 Subject: Airplanes -- Ice prevention. Excerpt: . . . of FAAs rulemaking efforts. In 2001, we reported that a major reform effort begun by FAA in 1998 did not solve long-standing problems with its rulemaking process, as indicated both by the lack of improvement in the time required to complete the rulemaking process and by the agency's inability to consistently meet the time frames imposed by statute or its own 22 guidance. External pressures - such as highly-publicized accidents, recommendations by NTSB, and congressional mandates - as well as internal pressures, such as changes in management's emphasis continued to add to and shift the agency's priorities. For some rules, difficult policy issues continued to remain unresolved late in the process. The 2001 report contained 10 recommendations designed to improve the efficiency of FAAs rulemaking through, among other things, ( 1 ) more timely and effective participation in decision-making and prioritization; ( 2 ) more effective use of information management systems to monitor and improve the process; and ( 3 ) the implementation of human capital strategies to measure, evaluate, and provide performance incentives for participants in the process. FAA 23 implemented 8 of the 10 recommendations. NTSB's February 2010 update on the status of its Most Wanted recommendations related to icing characterized FAAs related rulemaking efforts as unacceptably slow. In December 2009, at FAAs International Runway Safety Summit, NTSB's Chairman commented, How do safety improvements end up taking 10 years to deliver They get delayed one day at a time. . . and every one of those days may be the day when a preventable accident occurs as the result of...
