As an introduction to this little collection of notes and drawings the author wishes to call the attention of High School boys especially to the fact that this trade has not received the attention it deserves from the schools. In recent years several vocations such as printing, concrete construction, automobile repair and electrical work have found a place in the schools while others seem to be losing ground. It seems to be true that trades such as blacksmithing and molding which have been influenced by the introduction of new machinery which is more or less automatic, have become less attractive to boys. Sheet metal work as a vocation has many attractive features. It is a large and growing industry represented both in the building trades and in modern automobile construction, furniture and boat building and in the construction of manufactured articles. The introduction of autogenous welding and electric welding has done much to make possible the use of sheet metal in new forms. All well trained sheet metal workers can draft their own patterns. Boys who have been unable to see any use for intersections and developments in mechanical drawing can quickly see the relation between this branch of drawing and the drafting of patterns. The working of metal in sheet form is light, interesting and instructive. The making of kitchen utensils, such as pans, sugar scoops, funnels, dustpans, canteens, bread boxes and other articles is attractive to most boys. A large number of hand operated machines are used and the...
