GEOMETRIC INVARIANT THEORY FOR POLARIZED CURVES

Springer-Verlag Gmbh Dez 2014, 2014. Taschenbuch. Book Condition: Neu. 236x151x17 mm. Neuware - We investigate GIT quotients of polarized curves. More specifically, we study the GIT problem for the Hilbert and Chow schemes of curves of degree d and genus g in a projective space of dimension d-g, as d decreases with respect to g. We prove that the first three values of d at which the GIT quotients change are given by d=a(2g-2) where a=2, 3.5, 4. We show...

Reviews

It is simple in read easier to understand. I am quite late in start reading this one, but better then never. Its been designed in an exceptionally easy way in fact it is just following i finished reading through this publication where basically transformed me, alter the way i really believe.
-- Ms. Christy Ondricka DDS

This publication is wonderful. It normally is not going to expense too much. Its been printed in an extremely straightforward way in fact it is merely following i finished reading this publication where actually transformed me, modify the way i really believe.
-- Russell Adams DDS
